FREE NHS HEALTH CHECK

The NHS Health Check is a health check-up for adults in England aged 40-74. It's designed to spot early signs of stroke, kidney disease, heart disease, type 2 diabetes or dementia. As we get older, we have a higher risk of developing one of these conditions. An NHS Health Check helps find ways to lower this risk.

You will be invited for an NHS Health Check every five years if you are between 40-74 years old, as long as you don't already have an existing vascular condition.
